EDUCATION

Bachelor of Computer Science, ICAFI University, Tripura

2023-2027

9.54 CGPA

SKILLS

Languages	C++, Python, JavaScript, TypeScript
Frameworks/Libraries	React, Node.js, Express.js, NestJS, FastAPI, Django, LangChain, Streamlit, TypeORM
Databases	PostgreSQL, MongoDB, MySQL, Redis, ChromaDB
Tools	AWS, Azure, Docker, Kubernetes, Git, GitHub, Hugging Face, NGINX

WORK EXPERIENCE

Full Stack Engineer (Freelance), Aaharan EduSMART Pvt. Ltd.

Jul 2025 – Jan 2026

Architected the Official District KPI Monitoring System for Gov of Tripura

- Engineered a scalable three-tier platform using React, TypeScript, Node.js, and PostgreSQL; integrated in-memory caching to slash server load by 75%.
- Enforced CERT-compliant security via TLS 1.3, NGINX, Redis rate limiting, HMAC signing, and secure OTP/JWT flows; deployed on Government VPS with CI/CD delivering sub-100ms latency for 800K+ users. [\(Demo\)](#)

Backend Developer Intern, National Informatics Centre (NIC)

May 2025 – Jul 2025

Built E-Commerce Platform for Self-Help Groups with Product Management and Cloud Storage

- Engineered RESTful product microservice using NestJS, TypeScript, TypeORM with PostgreSQL, implementing multi-tenant architecture supporting SHG/VO/CLF hierarchies with price handling and inventory management.
- Architected S3-compatible object storage with AWS SDK v3 and JWT-based authentication guards with RBAC for 6 user roles, reducing N+1 queries across distributed entities. [\(Cert\)](#) [\(Repo\)](#)

PROJECTS

Environmental Impact AI Agent – Sustainability Analytics Platform

- Developed full-stack Streamlit application with RAG architecture using LangChain, ChromaDB, and Groq LLM, helping users reduce environmental footprint across CO₂, water, and waste metrics by up to 40%.
- Implemented natural language query processing, CSV/Excel analysis, interactive dashboards with real-time visualizations, and A+ to F environmental scoring system. [\(Demo\)](#) [\(Repo\)](#)

7obits — Freelancer & Agency Operations SaaS (Ongoing)

Apr 2026 – Present

Next.js 14, TypeScript, Supabase (Postgres/Auth), Redis, BullMQ, Stripe, Resend, Vercel, PWA

- Architecting multi-tenant SaaS platform with integrated CRM, project management, and automated invoicing; engineered PostgreSQL RLS policies and Redis/BullMQ worker infrastructure for async billing workflows.
- Implementing automated billing cycles (milestone, retainer, hourly), payment reconciliation, and real-time analytics dashboards for revenue and pipeline tracking. [\(Repo\)](#)

Oatly — AI Resume Builder (Contributor)

Jan 2026 – Feb 2026

Next.js, React, TypeScript, MongoDB, Tailwind CSS, REST APIs

- Migrated AI usage limits from client-side local storage to secure server-side credit system using MongoDB, implementing dedicated balance and deduction APIs to ensure feature access integrity.
- Refactored resume rendering and PDF export flows with Optimistic UI updates; optimized AI Auto-Tailor UX by implementing tone selection and guided writing prompts. [\(Repo\)](#)
